

USE CASES FOR LAW FIRMS

MULTIJURISDICTIONAL M&A DUE DILIGENCE

MARCH 2021

WE HELP LAW FIRMS QUICKLY ANSWER QUESTIONS ABOUT THEIR CONTRACTS

Della is a contract review software which allows lawyers to effectively manage their workload. This means businesses and law firms can focus more time on legal work not paperwork.

At the core of Della is the ability to define your own checklists to review contracts. Checklists simplify, reduce risk and speed up manual processes.

Thanks to its innovative use of AI, Della will answer the questions from your checklists, and continuously learns from user corrections to accelerate the process even more.

THE CHALLENGE

COMPLEX REVIEWS MAKE RED FLAGS DIFFICULT TO SPOT

- Finding similar data points like 'change of control' 'assignment' or 'termination' across thousands of legal documents is very difficult and significantly time consuming.
- Additionally, multijurisdictional deals often involve numerous general councils, different languages and regulations adding to the complexity.
- Lawyers working in different jurisdictions use their own distinctive reporting templates that are difficult to compare and reconcile.
- It is difficult to effectively pull data from numerous templates and flag the most crucial data points meaning important clauses might be overlooked.
- As a result, red flags are difficult to spot and M&A deals take a long time to get signed.

THE SOLUTION

HOW DELLA HELPS

Della can support the review process of M&A Due Diligence in one centralised system by analysing data points across multiple documents, regardless of the jurisdiction, language and type of legal document.

Della enables you to ask a question in multiple languages and all you need to do is type it. You can create checklists based on these questions so that you can detect red flags on a more granular level. Della enables you to be reactive during the representations schedule and interrogate the contracts to check for any additional red flags.
